Introduction

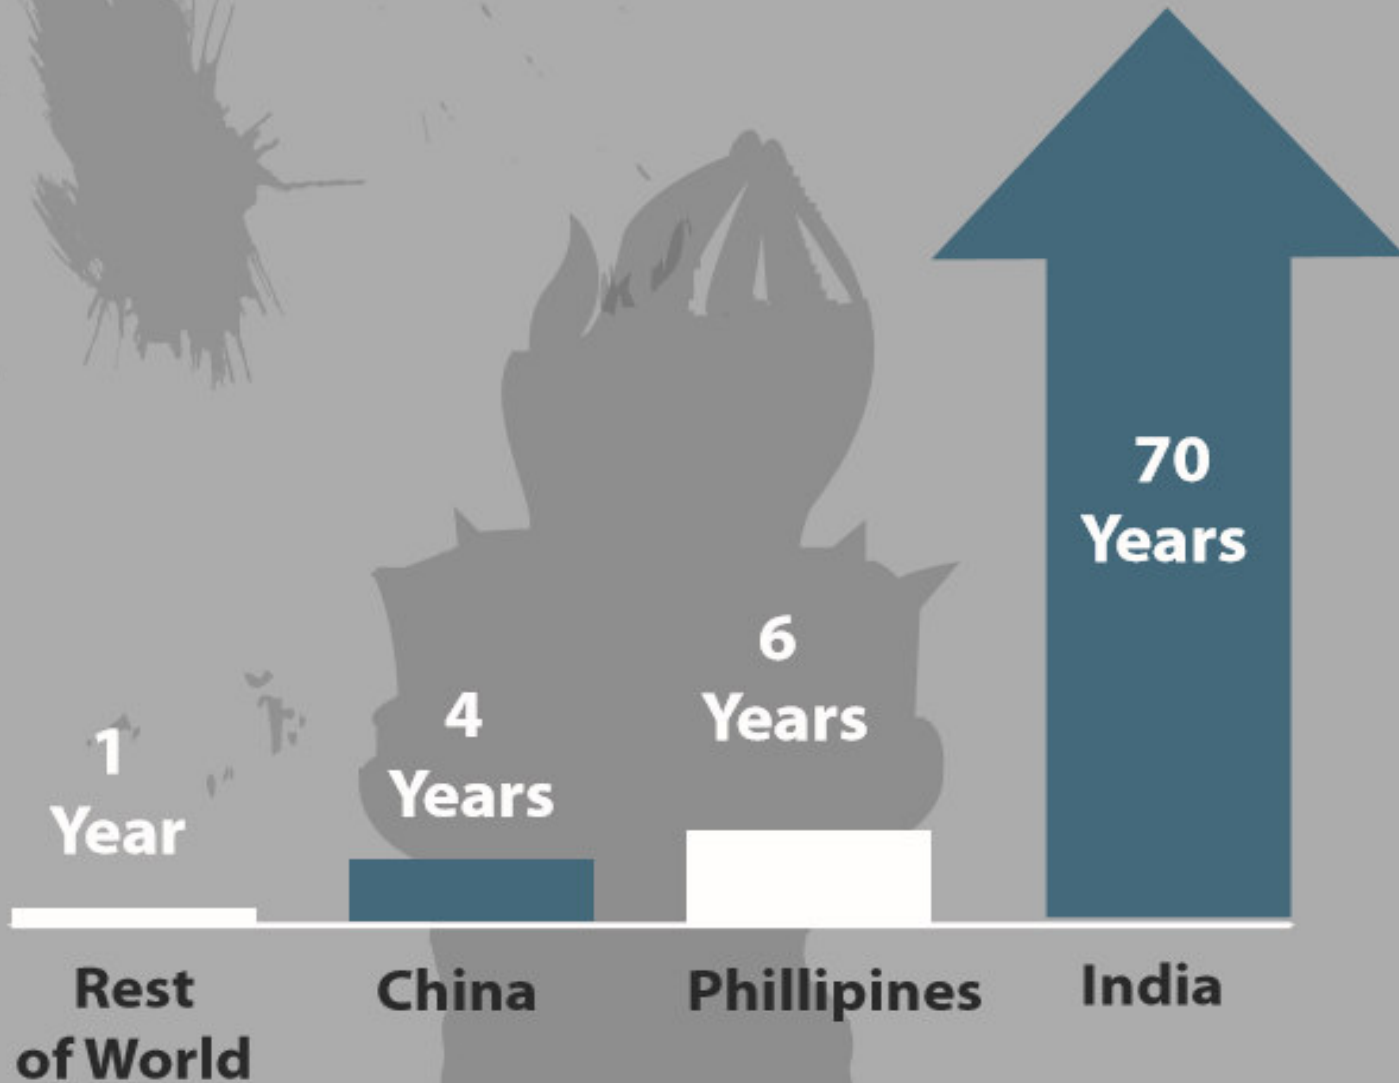

1.5 Million

- High Skilled Immigrants are stuck on Green Card Backlog in USA
- Constitute
 - Tech Workers
 - Medical Professionals
 - Indian born kids

THE ISSUE

1 million Green Cards are issued every year. Only 80k goes to employment based (EB-2 & EB-3) immigration. A further 7% per country cap results in around 5k Green Cards for each country. However applications from populous countries average 80-100k a year, which adds 75-95k in backlog queue every passing year

Economic contributions

\$460-\$500 Billion

last 10 years to USA GDP

kids born in India and came with H1B parents

- Age 1-21: H4 without EAD
- Age 16-21: No Part time jobs
- Age 21-23 : reconvert to F1/H1
- Age 24-100: Wait for Green cards

What if all leave

- 35%-40% of Hindu population would be reduced in USA
- Will impact Indian business and many Infrastructures
- Many Tech companies and Hospitals will have adverse impact
