They set forth the structure of the organization and guide the Board of Directors ("Board") in the conduct of its business. In essence, Bylaws are the operating manual for the not-for-profit, by-laws should be unique to each organization and tailored to the needs of the not-for-profit organization. Most temples are non-for profit, which requires a copy of Bylaws to be submitted to IRS. In this session we will cover: Understand Key Principles that ALL Board/Executive Members should know about Bylaws, Key parts that all Bylaws should have, Key Pitfalls to be aware of and how to avoid in Bylaws and finally a real time example of a case where a temple was involved in a legal battle with its members.

In volunteer based organization it is not always possible for each member to have those leadership skills and knowledge. Board members as well as the management teams that have these capabilities can lead successfully; on the other hand, lack of these capabilities could lead disastrous effect on the organization as well as the community. The objective of this workshop is to identify those critical skills and knowledge and develop long term strategy to deliver these skills to the leadership team of the organization. Ideally, aspiring leaders should receive this training in advance of their being elected or selected for the leadership positions, a backup option is also needed as an alternative for those who may have missed the initial training.</p>
